

## Numbering Equipment

The following procedures must be adhered to when numbering:

- Company Vehicles
- Sales and Manager's Trucks
- Shop Equipment
- Stenciled Owned Equipment

For more information, see: 12476 Equipment Numbers for Unmarked Equipment.

### Company Vehicles

All Company vehicles must be marked with the proper equipment number, including DOT and CA (California) numbers where applicable.

Use these steps to apply the equipment number to Service trucks.

Step	Image or Comment
<p>1. All Service trucks including the following must have a 2-inch die-cut decal equipment number in black (<b>Grainger Part # 4T732</b>).</p> <ul style="list-style-type: none"><li>• Stake Beds</li><li>• Water Trucks</li><li>• Dump Trucks</li><li>• Crane Trucks</li><li>• Service Trucks</li><li>• Delivery Trucks</li><li>• Parts Delivery Trucks</li><li>• Fuel Trucks</li><li>• Dumpster/Trash Trucks</li></ul>	

Step	Image or Comment
<p>2. Apply the equipment number to both sides of the cab.</p> <p><b>NOTE:</b> Apply DOT numbers as shown, where applicable.</p>	 <p>A side-view photograph of a white Ahern Rentals truck cab. A red rectangular box highlights the equipment number '67414' on the side of the cab. Below the box, the text 'USDOT 198130' is visible. The Ahern Rentals logo is also present on the side of the cab.</p>
<p>3. Apply the equipment number to the left rear of the service body.</p>	 <p>A rear-view photograph of the Ahern Rentals truck service body. A red rectangular box highlights the equipment number '67414' on the left side of the rear panel. The Ahern Rentals logo is visible on the right side of the rear panel. The truck is parked on a paved surface with trees and a building in the background.</p>

## Sales and Managers' Trucks

Use the following steps to apply the equipment number to Sale and Managers' trucks.

Step	Image or Comment
<p>1. Create a label using a P-touch label maker using the following format: <b>Unit 12345</b></p>	
<p>2. Sales and Managers' trucks must have a label with the equipment number attached to the inside of the gas cap door.</p>	

## General Rental, Shop, High Reach, and Heavy Equipment

All shop equipment must have the equipment number stenciled and engraved in a visible area.

All High Reach and Heavy equipment must be numbered on all four sides using a stencil.

Boom baskets must **NOT** be numbered.

Use the following steps to apply the equipment number to General Rental, Shop, High Reach, and Heavy equipment.

Step	Image or Comment
<p>1. Equipment must be stenciled with the equipment number. <b>Grainger Part # 6A231</b></p>	
<p>2. Place the stencils in the order of the equipment number.</p>	
<p>3. Tape the edges creating a 3-4 inch border around the stencils.</p>	
<p>4. Spray paint over the stencil with black paint using close even strokes.</p>	

Step	Image or Comment
<p>5. The equipment number is now visible on the equipment.</p>	
<p>6. Clean the stencils before returning them to the Parts counter. For more information, see: 15061 Cleaning Stencils After Use.</p>	

## Stenciled Owned Equipment

Owned Equipment must be engraved with the equipment number using the engraver available from the Warehouse. **Part # 3XA70**

All equipment contained on service trucks such as air compressors, welders, generators, etc. must be stenciled and engraved with an equipment number.

Step	Image or Comment
<p>1. Use this engraver pen to engrave the equipment number on owned equipment. If this pen is not available, obtain one from the Warehouse.</p>	

Step	Image or Comment
2. The equipment number must be engraved in a visible area on all owned equipment as shown.
